EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Pristelski on 9-27-2004.

The application has been amended as follows:

Cancel claims 21-26

Allowable Subject Matter

2. Claims 1 and 17-18 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 1 and 17-18 are allowable since certain key feature of the claimed invention are not taught or fairly suggested by the prior art. Specifically, in claims 1 and 17, "the gate line drive circuit unit has at least one tristate buffer and one gate selection pulse change-over switch per a gate signal line". The closest prior art, Kwon (6,124,840) teaches of a gate line driver having a tristate buffer, but either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
